

have believed so very much in helping change young people's lives across this country of ours. Mr. FEENEY, Mrs. DAVIS and Mr. UDALL all saw the impact that Dr. Sally Ride had on so many young minds across this Nation to encourage them to study science and math and engineering-related classes. I think this is a wonderful way of saying thank you to another pioneer who has made a difference in so many people's lives.

I thank the gentleman for working with us on the resolution. I ask support for the resolution.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in strong support of H.R. 1313, Celebrating the 25th Anniversary of the first American Woman in Space, Dr. Sally K. Ride. This legislation gives us the opportunity to extend our appreciation and gratitude for Dr. Ride's excellence in service to the Nation as an astronaut, educator, and advocate for the next generation of women scientists and engineers. I would like to thank my distinguished colleague from Texas, Congressman LAMPSON, for introducing this important legislation.

Mr. Speaker, Sally K. Ride of Los Angeles, California, a physicist by training and an accomplished athlete, was selected as a National Aeronautics and Space Administration, NASA, astronaut candidate in 1978, as part of the eighth class of NASA astronauts and one of only six women in the class. On June 18, 1983, Dr. Ride was lofted into space aboard the Space Shuttle *Challenger* as part of the STS-7 crew, making her the first American woman in space. As a representative from "Space City Houston", I am personally inspired by Dr. Ride's accolades and triumph over the status quo.

The STS-7 crew launched two communications satellites from the shuttle and accomplished many first steps for the United States space program, including the first release and capture of a satellite using the shuttle's robotic arm, the first demonstration of a shuttle's flight in formation with a free-flying satellite, and the first United States-German cooperative material science experiments aboard the shuttle, as well as the conduct of other science experiments.

On October 5, 1984, Dr. Ride courageously made her second spaceflight as a mission specialist on STS 41-G, a mission that demonstrated the ability to refuel satellites in orbit and launched NASA's Earth Radiation Budget Satellite, which spent over 20 years providing valuable scientific data on the Earth's absorption and re-radiation of solar energy. However, training for Dr. Ride's third spaceflight assignment ceased after the tragic loss of the Space Shuttle *Challenger* and her crew in 1986. Following this, Dr. Ride was called to serve on the Presidential Commission on the Space Shuttle Challenger Accident.

Refusing to let the tragic loss of her crewmen deter her from her passion, Dr. Ride continued to serve the Nation's space program with distinction, authoring the 1987 report, *Leadership and America's Future in Space*, and serving on the Columbia Accident Investigation Board. As an educator, author of children's books, and advocate for the next generation of women in science, mathematics, and technology, Dr. Ride's work has contributed to the wellbeing of our youth.

Dr. Ride has worked tirelessly and passionately to encourage young women to follow the sciences, mathematics, and technology by promoting science festivals, camps, and other opportunities through which young women can acquire hands-on learning about science.

Mr. Speaker, I encourage my colleagues to join me in recognizing Dr. Sally K. Ride. This legislation gives us the opportunity to extend our appreciation and gratitude for Dr. Ride's excellence in service to the Nation as an astronaut, educator, and advocate for the next generation of women scientists and engineers.

□ 1215

Mr. LAMPSON. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. LAMPSON) that the House suspend the rules and agree to the resolution, H. Res. 1313.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. LAMPSON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

#### COMMEMORATING THE 25TH ANNIVERSARY OF THE SPACE FOUNDATION

Mr. LAMPSON. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 1312) commemorating the 25th anniversary of the Space Foundation.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

##### H. RES. 1312

Whereas, on March 21, 1983, the United States Space Foundation was founded by a small group of pioneering individuals in Colorado Springs, Colorado;

Whereas 2008 marks the 25th year of excellence and service of the Space Foundation;

Whereas the mission of the Space Foundation is to advance space-related endeavors to inspire, enable, and propel humanity;

Whereas the Space Foundation has become the leading nonprofit organization advancing the exploration, development, and use of space and space education for the benefit of all humankind;

Whereas the Space Foundation embraces all aspects of space including commercial, civil, and national security;

Whereas the current national security environment requires extensive use and advancement of space-based assets;

Whereas the Space Foundation has contributed to space education programs in all 50 States and also in Europe and Asia;

Whereas the Space Foundation is regarded internationally as a leading space advocacy organization, and is a member of the United States Delegation to the United Nations Committee on the Peaceful Uses of Outer Space; and

Whereas the Space Foundation hosts the National Space Symposium and Strategic

Space and Defense, 2 of the top conferences for space professionals: Now, therefore, be it

*Resolved*, That the House of Representatives—

(1) recognizes the contributions made by the Space Foundation; and

(2) commemorates the Space Foundation's 25 years of excellence and support to the Nation.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. LAMPSON) and the gentleman from Florida (Mr. FEENEY) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

##### GENERAL LEAVE

Mr. LAMPSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on H. Res. 1312, the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LAMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H. Res. 1312 which commemorates the 25th anniversary of the Space Foundation. The Space Foundation was founded in 1983 in Colorado Springs, Colorado, with the purpose of helping to advocate the Nation's space-related endeavors. Over the past 25 years, it has carried out that mission in an impressive fashion. It has grown to the point where it now undertakes space advocacy and space education initiatives in all 50 States.

As someone who feels passionately about the importance of getting our young people interested and educated in math and science, I want to call particular attention to the foundation's educational activities. The Space Foundation has recognized that space exploration is something that can really inspire kids and propel them to study hard so that some day they, too, can be a part of the Nation's endeavors in space. The foundation is doing work, important work in promoting science education, and I salute them for it.

In addition, the Space Foundation has involved itself in seeking the best path forward for the Nation across a range of commercial, civil, and national security space issues, and it consistently provides a respected forum for policy discussion and debates. In short, the Space Foundation is at the forefront of promoting the development and use of space for all humankind.

I want to join Mr. LAMBORN and other Members in congratulating the Space Foundation on 25 years of accomplishment and in wishing the foundation all the best for another 25 years of service.

Mr. Speaker, I reserve the balance of my time.

Mr. FEENEY. Mr. Speaker, I would yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Resolution 1312 which commemorates the 25th anniversary of the Space Foundation. I want to thank its sponsors, Mr. LAMBORN of Colorado and Mr. LAMPSON from Texas, for this very important resolution honoring the Space Foundation.

The Space Foundation was established in Colorado Springs in 1983 to provide a nonpartisan source of credible information to a wide variety in the space community, from professionals to the general public.

Over the last 25 years, the Space Foundation's mission has been to advance space-related endeavors to inspire, enable, and propel humanity. The Space Foundation has developed alongside the space community by fostering and promoting a greater understanding and awareness and practical uses of space for the benefit of civilization in all aspects of space: commercial, civil, and national security.

Perhaps the most notable has been the Space Foundation's commitment to space education programs. Since its inception, the Space Foundation has been a leading champion for bringing space science into the classroom. The Space Foundation's Summer Institute provides a unique educational environment in which teachers can continue their space studies and help enhance their students' classroom experience.

In addition to the Summer Institute, the Space Foundation hosts the National Space Symposium and Strategic Space and Defense, two of the top three conferences for space professionals worldwide. I might say I had the honor of attending a recent conference in Colorado Springs. The Space Foundation has been useful in efforts to bring together all aspects of the space industry and has established itself a crucial member of the space community.

I'm proud to support this resolution honoring a significant organization, and I urge my colleagues to also support House Resolution 1312.

With that, I would reserve the balance of my time.

Mr. LAMPSON. Mr. Speaker, I will reserve the balance of my time.

Mr. FEENEY. Mr. Speaker, I would like to yield 4 minutes to the sponsor of the resolution, the gentleman from Colorado (Mr. LAMBORN).

Mr. LAMBORN. I thank my colleague from Florida.

I rise today, Mr. Speaker, in support of this resolution, H. Res. 1312, commemorating the 25th anniversary of the United States Space Foundation. Founded in March of 1983 by a small group of pioneering individuals in Colorado Springs, Colorado, the Space Foundation serves to advance America's space-related endeavors to inspire, enable, and propel humanity. This nonprofit organization is a leader in advancing space exploration, development, and use of space and space education for the benefit of all humankind and embraces all aspects of space including commercial, civilian, and national security components.

The Space Foundation's leadership in international space advocacy has led to their membership in the United States Delegation to the United States Committee on the Peaceful Uses of Outer Space.

I urge my colleagues to support this resolution and recognize the contributions made by the Space Foundation and commemorate their 25 years of excellence in support of this Nation.

Mr. FEENEY. I have no further speakers. I am prepared to close.

With that, I want to thank Mr. LAMBORN and urge the resolution's adoption by the full House.

I yield back the balance of my time.

Mr. LAMPSON. Mr. Speaker, I, too, want to congratulate Mr. LAMBORN for his recognition of this legislation, and I encourage my colleagues to support it. The most important thing that I saw as a physical science teacher in high school for many years, particularly during the years of the Apollo missions to and from the Moon, was the excitement of young people, and this is exactly what this resolution is about and what the space advocacy has been about.

I urge support of House Resolution 1312.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. LAMPSON) that the House suspend the rules and agree to the resolution, H. Res. 1312.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

#### COMMEMORATING THE 50TH ANNIVERSARY OF THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Mr. LAMPSON. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 1315) commemorating the 50th Anniversary of the National Aeronautics and Space Administration.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

##### H. RES. 1315

Whereas the National Aeronautics and Space Administration was established on July 29, 1958;

Whereas on May 5, 1961, NASA successfully launched America's first manned spacecraft, Freedom 7, piloted by Alan B. Shepard, Jr.;

Whereas in July of 1969 President John Kennedy's vision of landing a man on the moon and returning him safely to Earth was realized with the Apollo 11 mission, commanded by Neil A. Armstrong, Lunar Module Pilot Edwin "Buzz" Aldrin, Jr., and Command Module pilot Michael Collins;

Whereas on April 12, 1981, NASA began a new era of human space flight and exploration with the launch of the first Space

Shuttle Columbia, commanded by John W. Young and piloted by Robert L. "Bob" Crippen;

Whereas NASA has greatly expanded our knowledge and understanding of our planet and solar system through various unmanned vehicles utilized on numerous missions;

Whereas, during the Cold War, NASA's achievements served as a source of national pride and captured the imagination of the world by demonstrating a peaceful use of our technological capabilities;

Whereas NASA now serves as a model for international cooperation and American leadership through the International Space Station and other scientific endeavors;

Whereas thanks to NASA and the far-reaching gaze of the Hubble Space Telescope, we have seen further into our universe than ever before;

Whereas NASA space probes have landed on or flown by eight of the planets in our solar system;

Whereas the aeronautics research by NASA has led to great discoveries and advances in aircraft design and aviation;

Whereas the work done by NASA has expanded the scope of human knowledge, created new technologies, and inspired young men and women to enter scientific and engineering careers;

Whereas in the last fifty years, NASA has positively impacted almost every facet of our lives; and

Whereas, thanks to the heroism, courage, and supreme sacrifice of our astronaut corps over the last five decades, we are now able to live and work in space for the benefit of all men: Now, therefore, be it

*Resolved*, That the House of Representatives—

(1) honors the men and women of the National Aeronautics and Space Administration on the occasion of its 50th Anniversary;

(2) acknowledges the value of NASA's discoveries and accomplishments; and

(3) pledges to maintain America's position as the world leader in aeronautics and space exploration and technology.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. LAMPSON) and the gentleman from Texas (Mr. MCCAUL) each will control 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. LAMPSON).

##### GENERAL LEAVE

Mr. LAMPSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on H. Res. 1315, the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LAMPSON. Mr. Speaker, I yield myself such time as I may consume.

I rise today to commemorate the 50th anniversary of the National Aeronautics and Space Administration, whose many outstanding achievements have provided many immeasurable benefits for the United States and the world.

It was 50 years ago this month, specifically July 29, that President Eisenhower signed the National Aeronautics and Space Act of 1958 that established NASA. At that time, the American public was still reeling from the impact of the Soviet Union's successful
